This document describes the Internationalized Domain Names (IDN) Character Table to be used by NeuLevel in the .BIZ TLD registry for the registration of .BIZ domains in the Spanish language.

We advise registrants to carefully consider the potential confusion over the perception of equivalence between an accented Latin character and another sequence of Latin characters (with or without accents.) There exists no equivalence rule that can be applied universally as any such mappings are generally dependent on the language, culture and context in which an IDN is used.

This table is in compliance with the ICANN Guidelines for the Implementation of Internationalized Domain Names and is intended for publication in the IANA IDN Character Table Registry.
